The following appendix contains snapshots of the community perception of violence and the reported crime trends for the past five years for each police beat in Oakland. This appendix is arranged into three sections, corresponding to the three command areas into which Oakland’s 57 police beats fall. Each section begins with a map of the police beats by district and policing area, with bar charts depicting the 120-day running average number of total reported crimes per month for the period ending March 31, 2009, using those custom crime indexes introduced previously in the report. The following page, “How to Read the beat Profiles” details the methods that were used to analyze data as well as noting information sources.

The map below shows crime count averages for each policing district in Oakland for the month of March, 2009. The highest total crime counts are found in District 7, which also has the highest level of violent crime city-wide. The lowest overall crime is found in District 5, although violent crime levels are lowest in District 3.
How to Read the Beat Profiles

**Stressor Ranking:** The Oakland Police Department (OPD) uses a rating system to determine needs-based resource allocation across its 57 beats. Using demographic, socioeconomic, and historical-crime data, beats are assigned “stressor” ratings ranging from 0-11. Beats rating 4 or higher are deemed “high stressor”, 2-3 are deemed “medium stressor,” and 0-1 are deemed “low stressor”. The OPD’s methodology for the stressor calculations is documented at: http://measurey.org/uploads/Microsoft%20Word%20-%20Methodology%20for%20Measure%20Y%202009%20web.pdf

**Community Perception of Safety, Police, and Prevention Activities:** Residents were asked to share their general perceptions about the OPD’s role in contributing to neighborhood safety and security. Respondents were asked about their top concerns for the neighborhood, their interactions with NCSCs, and their perceptions of OPDs efficacy in relation to their neighborhood’s primary challenges. Neighborhood concerns that tied are listed with bullet points. Source: Gihuly, Kim. (2008). Neighborhood Crime Prevention Councils. Community Engagement in Community Policing: How Does It Work in Oakland? An Evaluation Report. Oakland, CA: Neighborhood Services Division.

**Stressor Index:** The left portion of the page shows the constituent crime-level, demographic, and socioeconomic components of the stressor methodology. Those components constituting “high stressor” have been highlighted in yellow. Source: Department of Human Services: Measure Y. (2009). Revised Stressors, Released January of 2009. Oakland, CA.

**Area and District information** has been provided for each beat to facilitate navigation within the section.

**Crime Trends:** The second page of each beat profile features a four-year crime trend analysis. As in other sections of this report, crime data has been disaggregated by crime type and by total “Part One” crimes. In order to provide analytically richer long-term trend analysis, analysts have employed 120-day running-average crime totals, smoothing-out any dramatic day-over-day fluctuations that may have occurred. Below the crime trend chart, each beat profile includes a four-year table comparison for each crime type. Additionally, total crime counts are included for four of the five crime indexes for the past two years. Source: Oakland Police Department Records Management.
Command Area 1 covers West Oakland, North Oakland, and a small section of Central Oakland. The 120-day trailing average number of crimes per beat varies considerably: the lowest beat, 13X, reported 16 crimes over the 30-day period ending on March 31, 2009, while the highest beat, 8X, reported 222. Violent crimes were most prevalent in beats 4X and 6X.

- When there is a crime or a safety problem here, the police do something about it. 27% agree
Beat 1X
Beat 1X NCPC

Four-Year Crime Trends
Of the violent crimes that occurred in Beat 1X from 03/31/05 to 03/31/09, almost none were classified as “part one.” Rather, property crimes constituted the largest share of total crimes, representing more than half of all crimes by 03/31/09, even in spite of major reductions since 06/08. Two-year crime totals place this beat in the bottom quartile for all crime types, and while trends in violent crime mirror citywide averages, the four-year percentage decrease in reported crime for this beat stands out in comparison to citywide data.

Four-Year Crime Trends

Beat 2X was one of those original medium stressor beats at the onset of Measure Y, which has since been elevated to “high stressor” status. Violent crime rates have risen significantly over the four-year period, constituting a larger than average share of total crimes. Property crimes, meanwhile, have declined significantly since 2005. Two-year crime totals place 2X in the top-half of all beats for total violent and property crimes, despite below-average occurrences of status, drug, and sex crimes.

About My Neighborhood:
- In general my neighborhood is a safe place to live.
- When there is a crime or a safety problem here, the police do something about it.
Beat 2Y
Prescott NCPC

Four-Year Crime Trends

Although Beat 2Y has been downgraded from a “high stressor” beat in 2004 to a “medium stressor” beat in 2009, this has not been due to a significant decrease in total crime, but rather to relative citywide shifts in other components of the stressor methodology. Violent crimes constituted a larger than average share of total crimes of the four-year period, while a short term spike in both property and violent crimes contributed to a spike in “part one” crimes between 06/06 and 03/07. While property crimes have decreased in the past two-years, violent and drug crimes are now more prevalent than in 50% of all other beats.

Beat 6X
Beat 6 Advocates

Four-Year Crime Trends
Since the inception of Measure Y, Beat 6X's "high stressor" ranking has persisted. Two-year crime totals place 6X second in citywide drug crimes, as these, coupled with violent offenses, constitute larger than average shares of total crime in the four-year period. Property crimes, by contrast, occur relatively less frequently than in other beats with similar two-year crime totals.

**Beat 8X**

8X Neighborhood Council

**Four-Year Crime Trends**

Despite transitioning from “high stressor” to “medium stressor” status, beat 8X remains among Oakland’s most crime-plagued beats, registering a 10% increase in total crime over the four year period since 3/31/05. While there has been steady reduction in violent and property crime levels since 06/07, this has been inversely reflected by a significant increase in status crimes during the four-year period.

Four-Year Crime Trends
An original “medium stressor” beat, 4X was increased to “high stressor” ranking in 2005, and then reduced to “medium stressor,” again, in 2009. Yet despite this, Beat 4X continues to exhibit fourth quartile (highest) levels of violent, property, status, and drug crimes, when comparing two-year totals. Although property crime levels have been reduced since their 2007 peak, violent crime has been on the rise since 03/08.

Four-Year Crime Trends

During the four-year period, almost no violent crimes in Beat 14X were "part one" crimes. Two-year crime totals show that property crimes constitute a greater proportion of total crime in 14X than in the median OPD beat. Beginning in 12/08, the three most prevalent crime types—property, violent, and status—each exhibit notable reductions.

**About My Problem Solving Officer (PSO):**

- The PSO for my beat is responsive to community concerns.
- The PSO for my beat is effective in solving neighborhood problems.
- My beat currently does not have a PSO.
- The lack of a consistent PSO is an obstacle to getting problems in the neighborhood solved.

**About My Neighborhood:**

- In general my neighborhood is a safe place to live.
- When there is a crime or a safety problem here, the police do something about it.

Four-Year Crime Trends
Although exhibiting proportionately high levels of violent crime during the four-year period, Beat 20X was re-classified as a “medium stressor” beat in 2005—an improvement on the “high stressor” ranking it warranted at Measure Y’s outset. Notably, beginning in 06/06, drug crime levels grew dramatically, ending 03/09 at 75% above the 03/05 mark.

**Beat 27X**

**Melrose – High Hopes**

**Four-Year Crime Trends**

Beat 27X was ranked as a “medium stressor” beat in 2004, but was re-classified as a “high stressor” in 2009. In part, this was due to the significant number of “part one” violent crimes, which surpass property crimes in prevalence beginning 06/08. Excepting drug offenses, two-year crime totals place 27X above the median for citywide crime.

Four-Year Crime Trends
Beat 27Y was ranked as a “medium stressor” beat in 2004, but was re-classified as a “high stressor” in 2006, a ranking it has since retained. Among the most crime-ridden beats citywide, a comparison of two-year crime totals places 27Y in the fourth (highest) quartile for all crime types. Violent crimes increased dramatically over the four-year period, greatly exceeding property crimes as the most prevalent crime type by 03/08.
NCPC Survey Results

Number Responded: 22

Top Three Neighborhood Concerns:
1. Speeding
2. Drug activity
3. People loitering

Level of Involvement of those that responded:

**Beat 34X**

**Central Elmhurst**

**Four-Year Crime Trends**

Beat 34X was ranked as a high stressor beat at the inception of Measure Y and has since retained that ranking. Two-year crime totals place this beat in the top quartile for all categories of crime. In fact, 34X has the highest number of reported crimes of all of the police beats in Oakland. Violent crime constitutes a larger than average share of total crimes over the four-year time period. There was a huge spike in drug related crimes from September 2006 to March 2008, and a similar spike in status crimes during that same time period. The highest disparity between the percent change between 34X and the other high stressor beats is the marked increase in drug offenses, a full 57 percentage points higher than average.

NCPC Survey Results

Number Responded: 27

Top Three Neighborhood Concerns:
1. Abandoned vehicles
2. Speeding
3. Development

Level of Involvement of those that responded:
- Called their Neighborhood Service Coordinator during the past year.
- Called a Problem Solving Officer during the past year.
- Called a drug hotline during the past year.
- Were involved in or a member of a Neighborhood Watch/Merchant Watch or other crime prevention group during the past year.

NCPC Priority Issues Are Addressed By:
- NCPC members and the NCS work in partnership with the city/county agencies.
- Problem Solving Officers (PSOs) or other OPD.

Proportion of Issues That Are Successfully Resolved:

“"In general, my NCPC is very effective."” 19% agree

About My Problem Solving Officer (PSO):
- The PSO for my beat is responsive to community concerns.
- The PSO for my beat is effective in solving neighborhood problems.
- My beat currently does not have a PSO.
- The lack of a consistent PSO is an obstacle to getting problems in the neighborhood solved.

About My Neighborhood:
- In general my neighborhood is a safe place to live.
- When there is a crime or a safety problem here, the police do something about it.
Beat 35Y
35Y NCPC

Four-Year Crime Trends
A citywide comparison of two-year crime totals places Beat 35Y in the first (lowest) quartile for all crime types. Of all violent crimes that occurred in 35Y during the four-year period, almost none were “part one” classified.
